GET TO KNOW ABOUT ANGELIQUE

I am a Computer Science student living in Jakarta. As a student, of course, I can use several programming languages. I hope to bring passion and find a suitable job.

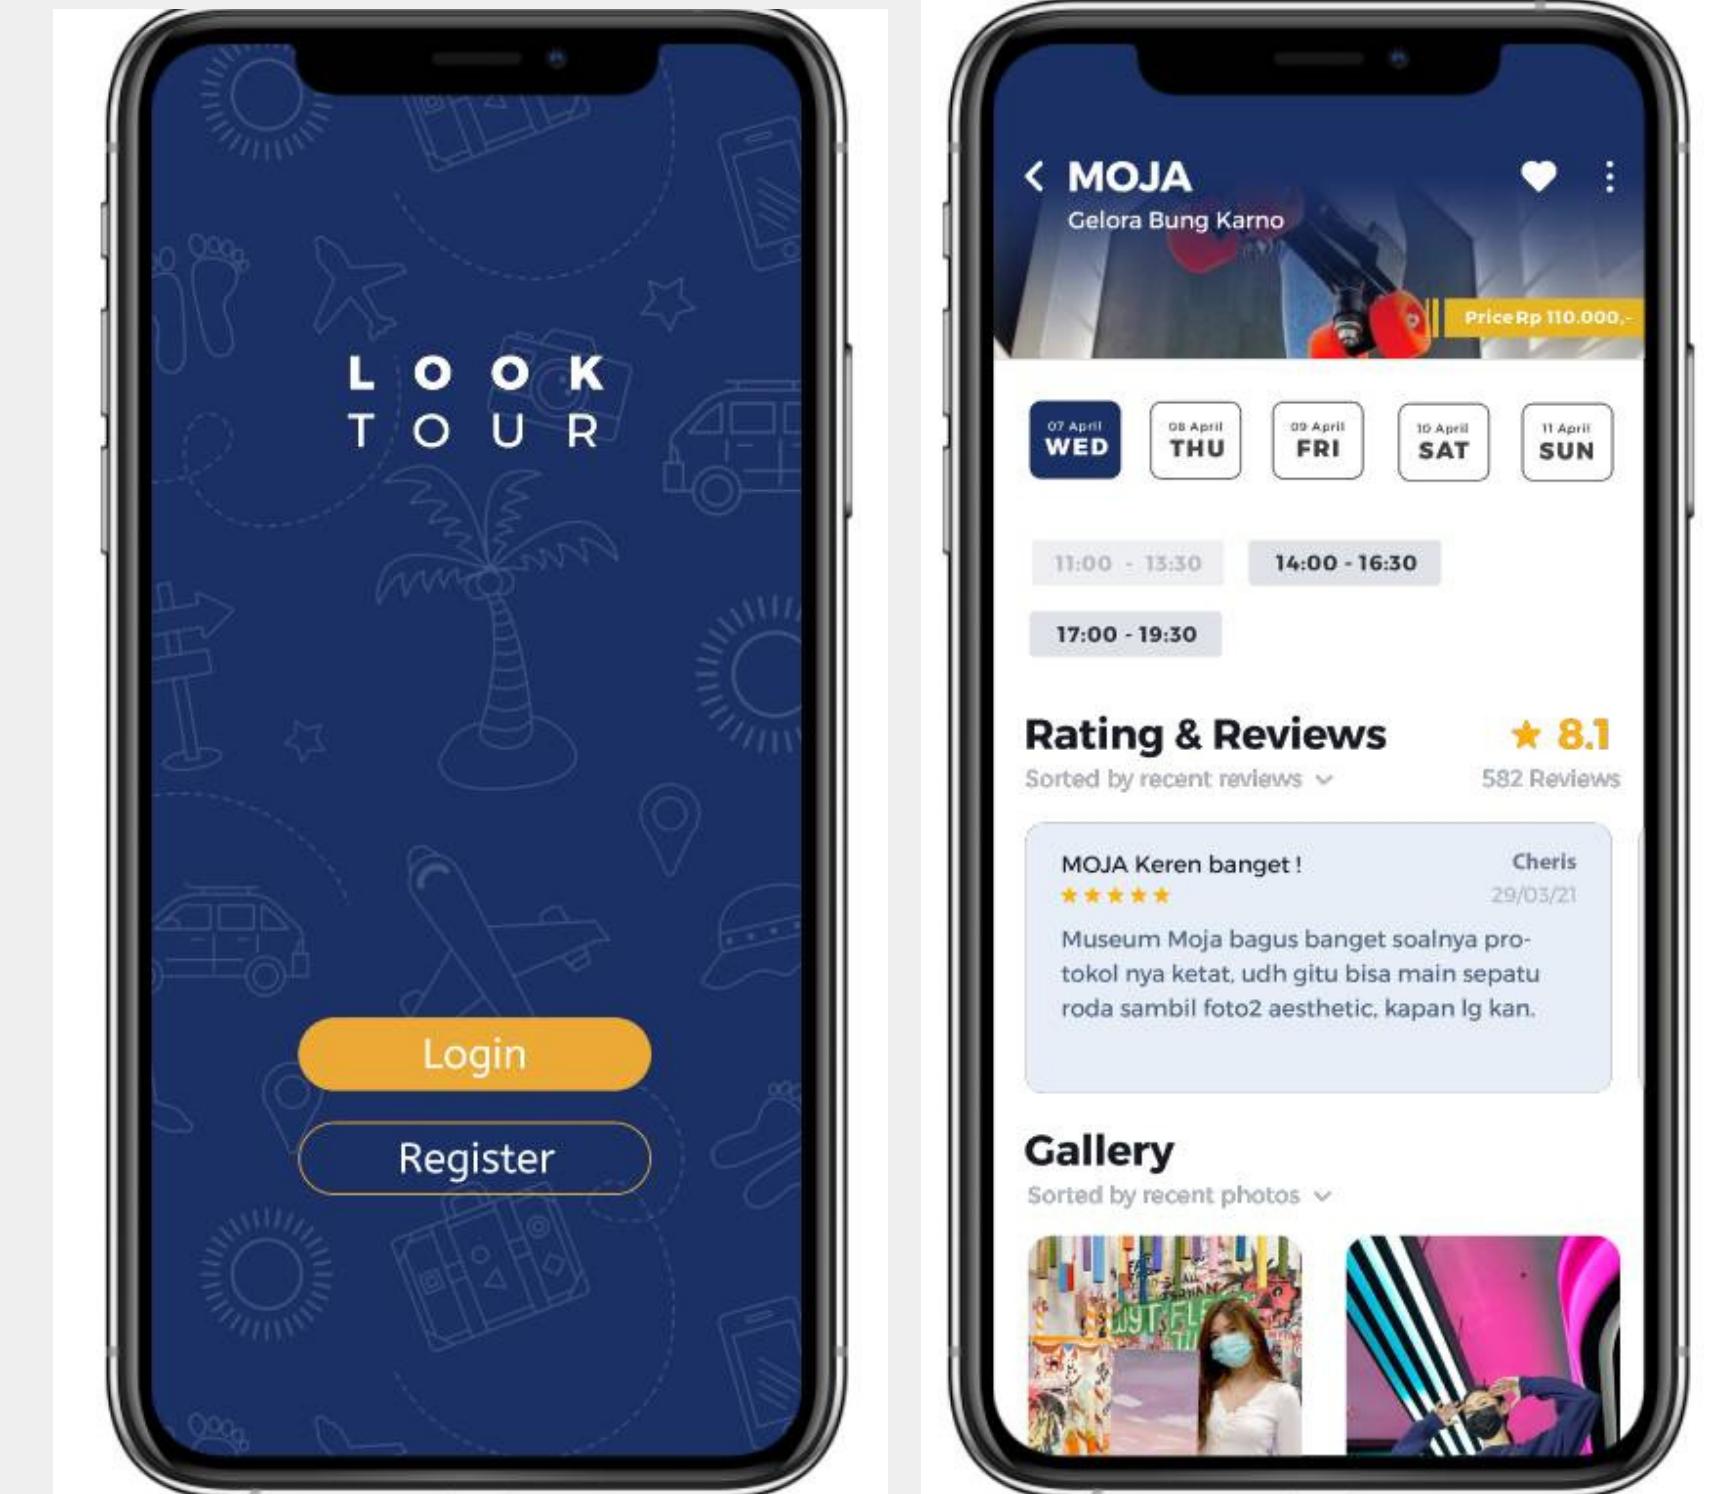

DESIGN USER INTERFACE (MOBILE)

Look Tour

When there was an entrepreneurship course assignment, I once developed a mobile application-based business idea for travel tickets. Here with the team, I develop features such as ticket booking.

DESIGN USER INTERFACE (MOBILE)

HealthGo!

This is one of the designs for one of the courses. This application is about health application to count calories and features to maintain health.

DESIGN USER INTERFACE (WEBSITE)

Little Me

The Form page for the store website is one of the website designs I created. I've used a pastel color scheme for this design.

The screenshot shows a registration form titled "Register" on a website. The header includes a logo for "Little me" with a green bird icon, a search bar, and navigation links for "Home", "Kategori", "Contact Us", and "Help". There are also icons for a bell and a lock, and a "Log in | Sign Up" link. The registration form has fields for First Name, Last Name, Email, Password, and Confirm Password, each accompanied by a small icon. A large green "Register" button is at the bottom. The footer contains the copyright notice "©Little me 2022" and links for "About" and "F&Q".

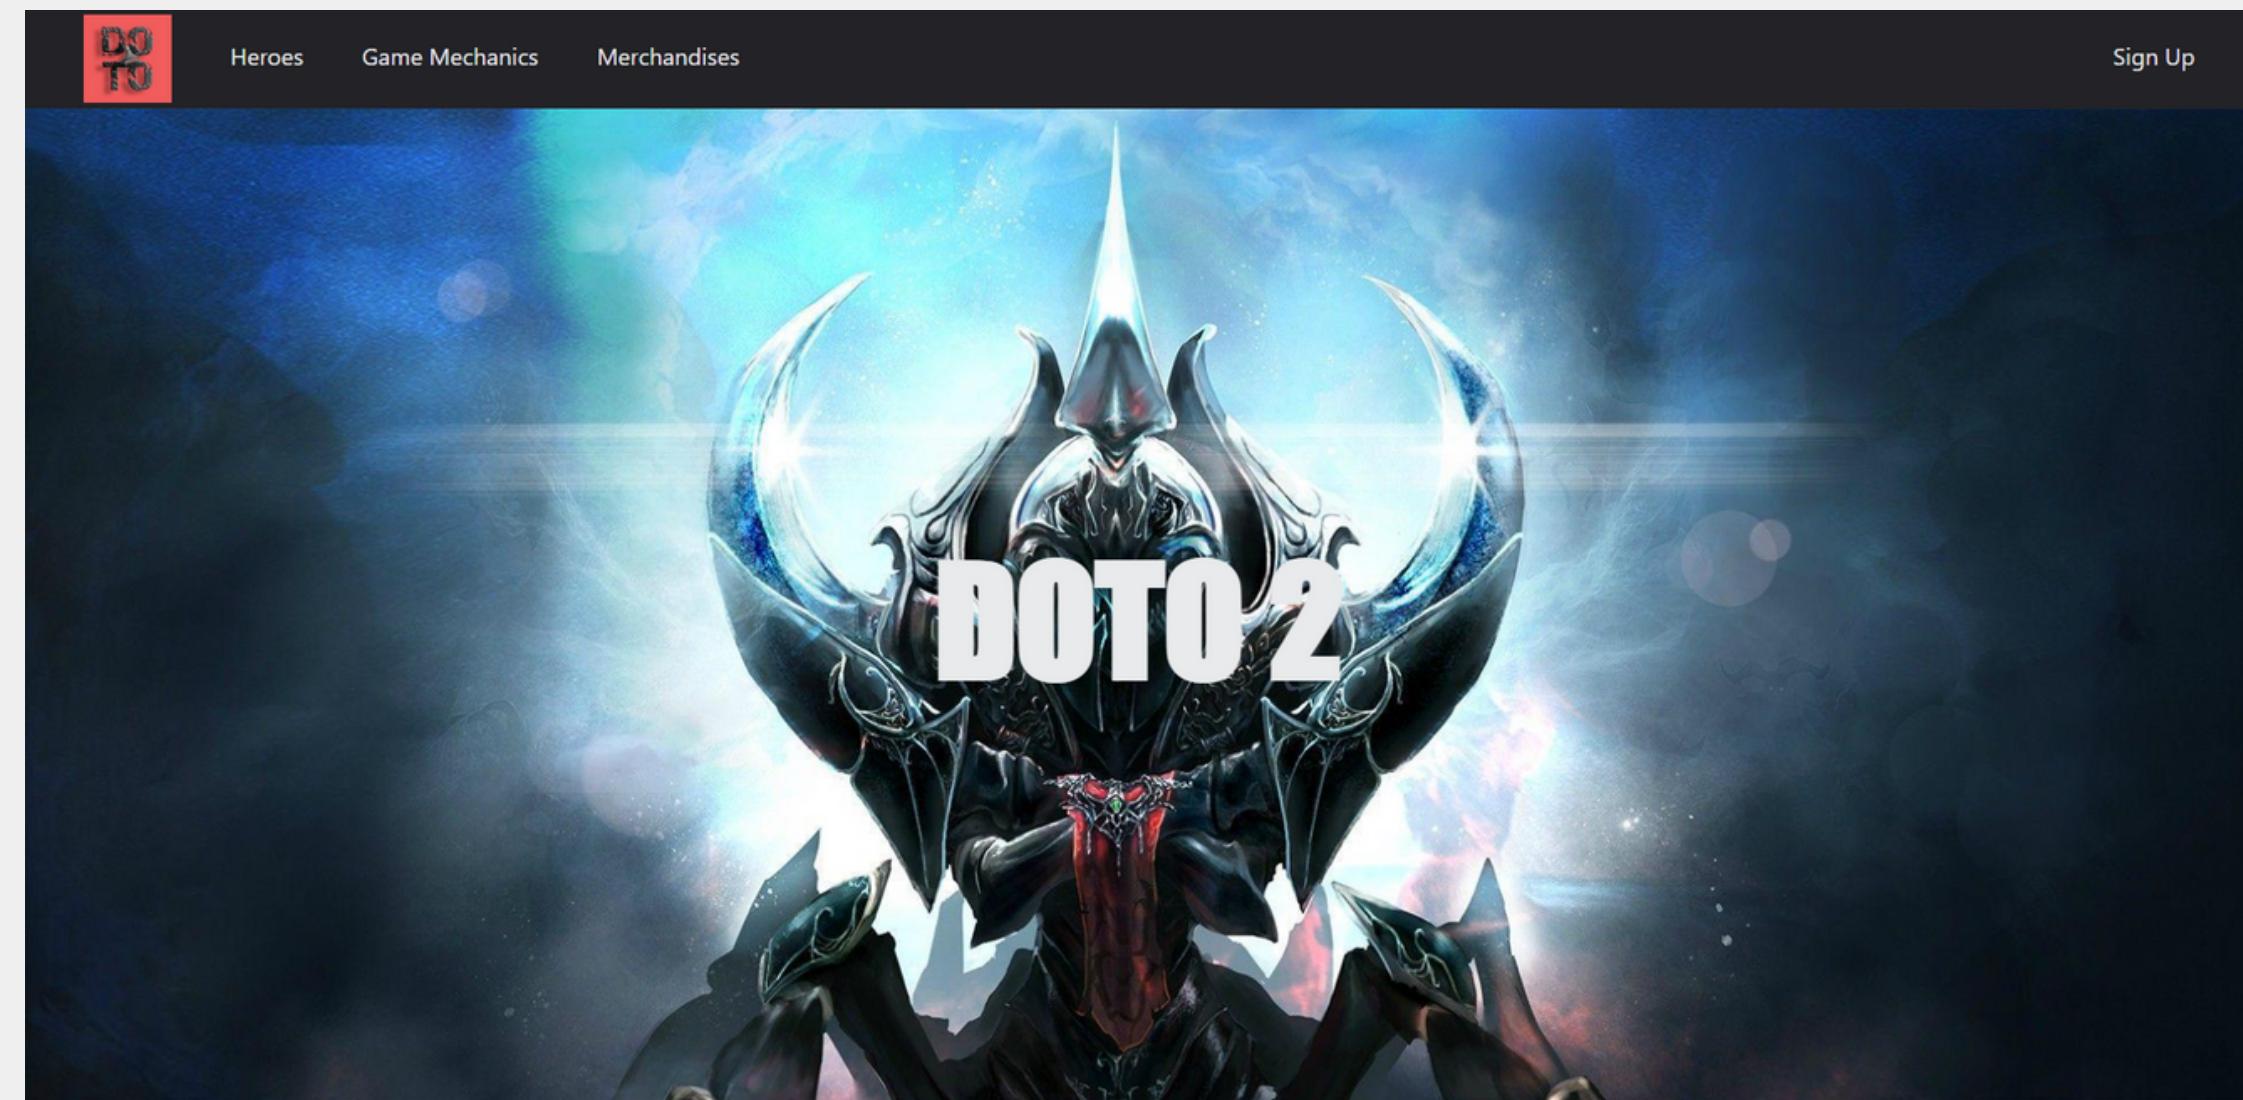

MAKE A SIMPLE APPLICATION (WEBSITE)

Doto 2

This is one of the outcomes of a website that was successfully developed utilizing the languages of HTML, CSS, and javascript. I developed the forms and products area with the team.

Doto 2

This is the result of the code I made.
